atlantis atlantis

new scheduled airline service

Atlantis is America's newest airline. Providing regularly scheduled flights between major cities in the Carolinas and Tennessee, Atlantis Airlines offers a whole new network of connecting links for air travel in the area.

With today's operating costs, even the smallest commercial jets (100 seats) are unable to operate profitably in most markets under 200 miles. As a consequence of this, Atlantis has developed a routing schedule with an eye to meeting travel needs the major airlines can no longer accommodate.

As the first airline to be formed since the 1978 Airline Deregulation Act, Atlantis Airlines is totally dedicated to bringing the finest service possible to short haul transportation. Guided by two former Piedmont Airlines executives with decades of experience to draw on, Atlantis is doing everything in an absolutely first class manner. Working closely with Eastern, Piedmont and United, it will provide reservations, ticketing, and most other services you would expect from a major airline.

As smaller aircraft are the key to servicing short-haul routes on a practical basis, Atlantis has selected the very best there is for this purpose: the de Havilland Twin Otter 300 series aircraft. The Twin Otter is a 20-seat aircraft powered by two Pratt and Whitney jet-powered prop engines. This type aircraft has been performing short-haul transportation around the world for over 10 years and has earned a reputation that is unsurpassed in its field. It is noted for its safety, reliability and comfort and is currently in use by over 20 operators in the U.S.

With the Twin Otter, Atlantis Airlines will also incorporate several important features not always associated with short-haul aircraft, such as radar, de-icing equipment and air conditioning. These extras are just one more way in which Atlantis gives you the best thing going in short distance air travel.
